

The background of the image is a light gray architectural line drawing of a complex steel truss structure, likely a roof or a large industrial building. The drawing shows a dense network of interconnected steel beams and girders, forming a series of triangular and quadrilateral truss elements. The perspective is from below, looking up at the structure, which creates a sense of depth and scale. The lines are thin and precise, typical of technical architectural drawings.

ABOUT US

Mill is an engineering and architectural firm specializing in international-scale solutions for industrial and commercial structures. With technical excellence and quality standards, we deliver end-to-end steel structure solutions encompassing design, engineering, implementation, and post-project services.

Leveraging a highly skilled technical team and an engineering-driven approach, we excel in developing optimized, innovative, and sustainable solutions. Our portfolio spans factories, energy facilities, industrial complexes, and public buildings.

Mill integrates advanced engineering methodologies with a client-centric approach to ensure the highest international standards. With projects in Turkey and Europe, we establish our reputation as a trusted partner for delivering durable and functional structures.

Our solutions go beyond conventional steel construction, offering custom-engineered designs and services tailored to meet each client. From logistics to after-sales support, Mill is dedicated to ensuring seamless execution and long-term value.

Mill focuses on delivering long-lasting, reusable, and environmentally conscious structures that contribute to our clients while addressing modern construction.

Transforming technical expertise and engineering excellence into real-world results, creating structures that stand the test of time.

SERVICES

Mill is renowned for its cutting-edge, world-class practices, uncompromising quality standards, and its center of excellence. Over the years, our work has been recognized and awarded by our clients, their testimonials, and numerous agencies and communities across the globe.
